

Final Report: DE-FG02-03ER54703

This is the final report for Grant Number DE-FG02-03ER54703, "Support for the Tenth Workshop on the Physics of Dusty Plasmas". This workshop was held from June 18 - 21, 2003 on St. Thomas in the US Virgin Islands. As part of this workshop, a special issue of the IEEE Transactions on Plasma Science [IEEE Transactions on Plasma Science - Special Issue on Dusty Plasmas, Vol. 32, No. 2, Part 2 of 3, (2004)] was produced as a refereed journal to document the research activities presented at this workshop.

Funds from the U.S. Department of Energy were used solely to support the publication costs of articles in that Special Issue. Special emphasis was given to younger researchers (e.g., graduate students, post-doctoral researchers, and new faculty members). Approximately 10 out of the over 34 papers were either fully or partially supported with these funds.
